Subject: RE: bringing the Dewey-Burdock permit application documents currently on our website into 508 compliance

Flag: Follow up

Asking Powertech for the Word files of their final permit application would make a lot more sense to me!

To confirm, this would really expedite our ability to post 508 compliant documents on the web so that they are fully accessible to those with visual, auditory, and other disabilities.

Sarah: can I pass this request on to Darcy?

Douglas

Subject: FW: bringing the Dewey-Burdock permit application documents currently on our website into 508 compliance

Hi Douglas,

Jason had a thought about requesting the original Word files from Powertech in order to convert them to 508 compliant pdfs. Is that something Darcy could ask them for during her next conversation with them? It would save me a lot of time. Otherwise, I would have to copy each page of the pdfs & copy it into Word, then do a lot of editing.

Thanks!

Valois

We could also put the burden on the applicant. Just an idea to lighten your load. Or you if can get me MS Word files I can handle converting them over and posting for you. -j

Hi again!

I was freaking out over the mention of the Madison & didn't read the rest of the email before replying. I think will have to convert the original permit application pdf files to Word then reconvert them back to pdfs from Word. I will start working on that next week after the meeting with the Oglala Sioux Tribe.

Subject: Dewey-Burdock summary page on website

Hi Valois,

I reformatted the Dewey-Burdock stuff into several paragraphs instead of the "wall" of text that HQ doesn't like to see. Can you take a look to make sure you still like it?

Also, I'd like to work with you to try to get 508 compliant pdf's up on that page. I haven't checked but the Dewey-Burdock stuff is the final item we don't have in the new format. It would also be good to post all pdf's on the Dewey-Burdock main page rather than have links to several other pages with the attachments. If you can get me the documents, I can update the site and see what I can do about getting them into a 508 compliant format.

Thanks,
Jason
